

Topic/Title

Alternative fôrråvarer og deres effekt på produksjonseffektivitet, fiskevelferd og produktkvalitet

Topic/Title

Alternative feed raw materials and their effects on production efficiency, fish welfare and product quality

Summary

Several studies are ongoing on the topic both in commercial scale and in small scale research facilities. Students are invited to join these projects and carry out their own thesis (bachelor or master) in connection with these research projects. The approach of the thesis' will depend on your field of interest, hence also the lab work. At present there are research studies ongoing at the Fishlab in Ås and also in commercial facilities at the West coast and Northern Norway. Opportunity to visit commercial farming sites in connection with field work can be discussed.

Subject area

Production efficiency, production biology, fish welfare and product quality

Language thesis

Optional, Norwegian or English

Bachelor or Master thesis

Both

Credits

Optional (bachelor 15; master 30-60ECT)

Project/company

Several projects, mainly industry financed

Please contact

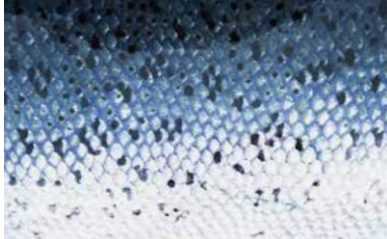

Turid Mørkøre; turid.morkore@nmbu.no

Topic/Title

Hvilke faktorer påvirker laksens skinnkvalitet; makroskopisk og mikroskopisk tilnærming

Topic/Title

Factors affecting the salmon's skin quality; macroscopic and microscopic approach

Summary

Several studies are ongoing on the topic; i.e. studies in research facilities and in commercial scale are conducted. Students are invited to join these projects and carry out their thesis (bachelor or master) in connection with these research projects. The approach of the thesis' will depend on the field of interest, hence also the lab work. At the moment there are research studies ongoing at the Fishlab in Ås and also in commercial facilities at the West coast and Northern Norway.
