

# Upkeep of the apartment.

---

By contract you have a responsibility to keep the apartment in good condition. Most problems are avoided if you adhere to these steps:

1. Do a weekly cleaning of the whole apartment
2. If something is broken, contact the Researcher Housing office at once
3. Always keep some heating on during the winter season, even if you are going away for just a couple of days.
4. Always keep the ventilation hatches open – also during the winter. Below you will find examples of ventilation hatches.
